

Talmo Road Reopens

November 1, 2013

A portion of Talmo Road in East Hall County has reopened after being closed for nearly three months following a heavy rainfall event.

Hall County Public Works Director Ken Rearden said a metal culvert underneath the road failed as a result of significant rain on Aug. 8. In order to repair it, he said Simpson Trucking and Grading, one of the County's on-call contractors, installed an 80-foot long, 9-by-9 cast-in-place box culvert at the site. Rearden said the contractor also repaved approximately 200 feet of roadway.

Construction was initially delayed as the County worked to obtain access to easements on private property in order to install the culvert.

Talmo Road was reopened to thru traffic Friday afternoon after all major repairs were complete.
