

Shirley Road Fire Station Groundbreaking Set For Oct. 2

October 1, 2013

A second groundbreaking ceremony is scheduled tomorrow for one of two new Hall County fire stations.

County leaders will break ground on the new fire station in Hall County Commission District 3 at 4209 Shirley Road at 10 a.m. Wednesday, Oct. 2. A groundbreaking ceremony for the new fire station in Hall County Commission District 2 at 4660 Ledan Extension was previously held on Tuesday, Sept. 17.

The new locations will increase the number of properties able to receive timely responses from fire services and will also lower home insurance premiums in the area.

Hussey, Gay, Bell and DeYoung and Charles Black Construction Company have served as the projects' architect and contractor, respectively.

Construction crews mobilized equipment on the sites around the first of September. Construction on the two new stations is expected to be completed in April of 2014.
